One Provider Only (Either ITP only (POS) or WBL/TITO (PIT-T) only)

1. There are a large number of programmes where there is only one provider (of either a PIT-T/POS – delivered by either a ITP or WBL/TITO) that need NO version/qual change --> these won't be touched at this point, even if they are delivered via WBL/TITO

2. There are a small number of programmes where there is only one provider and a change is required --> these subsidiary ITP, WBL/TITO will do an internal Type 2 change (with OFP required)

In both cases 1 and 2 above, in the Power BI tool we will note this as the unified programme.

ONE PIT-T and ONE POS

A. There are some programmes where there is one PIT-T AND one POS that need NO version/qual change --> these also won't be touched at this point, even if WBL/TITO deliver

B. There are a small number of programmes where a change is required --> these subsidiary ITP, WBL/TITO will do an internal Type 2 change (with OFP required) We would encourage connection between the two providers but not essential at this time

In both cases A and B above, in the Power BI tool we will note this as a unified qualification, with 2 programmes in existence.
